

Use this blank programming design process (PDP) template to help you create your program.

PDP Step 1: Identify the Goal

In your own words, identify the goal of the program. _____

PDP Step 2: Use the space below to create pseudocode.

PDP Step 3: Use a development environment or tool to implement your program.

PDP Step 4: Did the program behave as expected? _____

If there is anything you need to change, describe the changes you will need to make. _____

If you need to make changes, return to Step 2; make the changes in your pseudocode; and then implement your new solution.
If you do not need to make changes, continue to Step 5.

PDP Step 5: How can you improve the program? _____
