

Empowering Educators to Teach Cyber

CYBER.ORG is a cybersecurity workforce development organization with the goal to provide cybersecurity education to every K-12 student in the United States.

CYBER.ORG focuses on classroom teachers as the force multipliers helping to build the cybersecurity workforce of the future. The Cybersecurity Infrastructure and Security Agency (CISA) supports CYBER.ORG through a grant to develop and distribute elementary, middle, and high school cyber and cybersecurity curricula to educators across the country. CYBER.ORG also provides teachers with hands-on professional development training to facilitate the integration of cybersecurity education into their coursework.

Taking a closer look at CYBER.ORG activity in

Rhode Island

- Presented with CSTA Rhode Island Chapter
- Partnership with Rhode Island STEAM center to develop and pilot CYBER.ORG Computational Thinking modules
- Supported the adaptation of the K-12 Computer Science Education Standards to include a new Cybersecurity concept (2018)

CYBER.ORG Enrollment by County

Data through March 2022
