Curriculum Development Specialist

About CYBER.ORG

CYBER.ORG, the academic initiative of The Cyber Innovation Center, is a cybersecurity workforce development organization that targets K-12 students with cyber career awareness through curricular resources and professional development for teachers. CYBER.ORG supports national security by building and sustaining a pipeline of students who are prepared to pursue cybersecurity careers. CYBER.ORG has a footprint in all 50 states and four territories. We are looking for dedicated, creative, and highly motivated individuals to join our team. We offer tremendous opportunities in developing professionals for growth and advancement in cyber education. We are currently seeking a Curriculum Development Specialist to help us expand our national reach and create collateral to support the team. CYBER.ORG is dedicated to making cybersecurity education available to all K-12 students throughout the US. We believe the next generation of cybersecurity professionals should be representative of the country they work to keep secure. To that end, we seek to build a CYBER.ORG team that represents diverse viewpoints and experiences, and we are committed to creating an inclusive environment for all employees.

Job Overview

The Curriculum Development Specialist will report to the Director of Curriculum and will assist with developing classroom curriculum and student-facing activities focused on cybersecurity in grades K - 8. Our ideal candidate has experience teaching and/or developing classroom content around cybersecurity, computer science, or technology. This candidate must be able to communicate effectively and work well on team, potentially managing multiple projects at once. We're looking for someone who is excited about technology and would love to help teachers realize how cybersecurity impacts their students' everyday life.

CYBER.ORG's headquarters is located in Bossier City, LA; local candidates will receive preference, but remote candidates will be considered. This position requires overnight travel to lead professional development sessions or represent CYBER.ORG at conferences.

Responsibilities

- Be an active leader/participant in content generation through the curriculum design process.
- Lead and facilitate professional development workshops on CYBER.ORG content and curricula.
- Represent CYBER.ORG at conferences and educational events through workshops/speaking engagements
- Develop innovative and technology-focused classroom content and student-facing activities

Qualifications

Required:
- BA/BS
- At least 3 years of classroom teaching experience
- Knowledge of or desire to learn about cybersecurity and technology
- Ability to work in a fast-paced, project-driven environment
- Experience presenting to groups of students or teachers
- Strong communication and interpersonal skills
- A growth mindset and an excitement to learn about emerging technology

Preferred:
- Master's Degree
- Experience in curriculum writing or instructional design
- A basic knowledge of cybersecurity and its importance to the future of classroom instruction

To apply, please send a cover letter, resume, and a curriculum writing sample to resume@cyber.org.
